straight line, global scale, 64 steps: endpoint, signed deviation reference (RK6) - predicted, test split, by charge
run 9cef9c160b7d; x-range = 1st-99th percentile of both charges; outside = entries below+above the range (counted in N, mean, std, w68); w68 = half the 16th-84th percentile range
endpoint: whole track carried by the network from the first plane, compared on the last plane; one entry per track

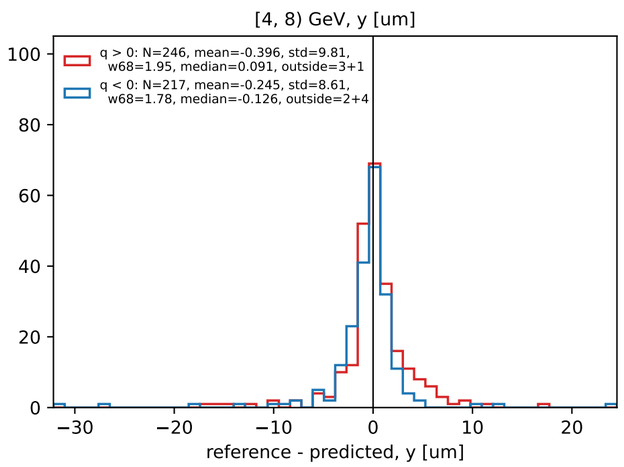

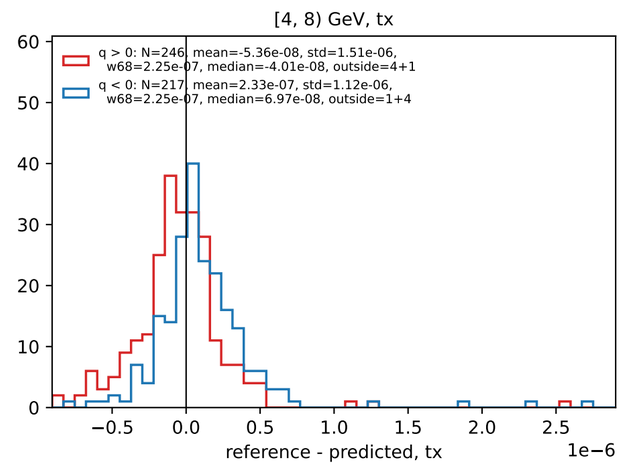

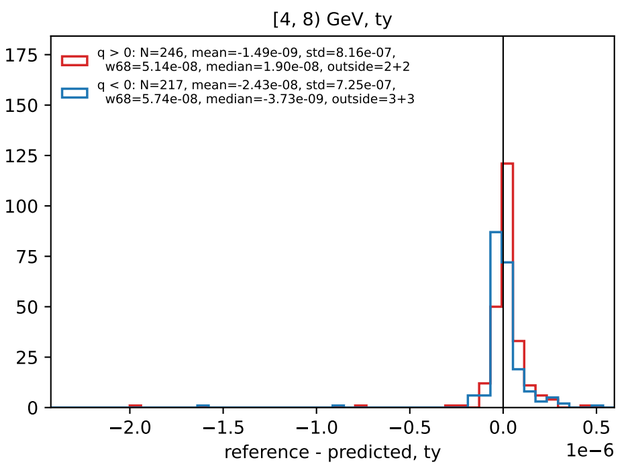

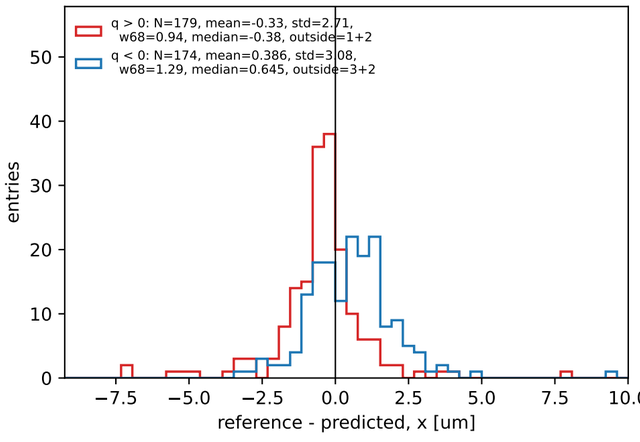

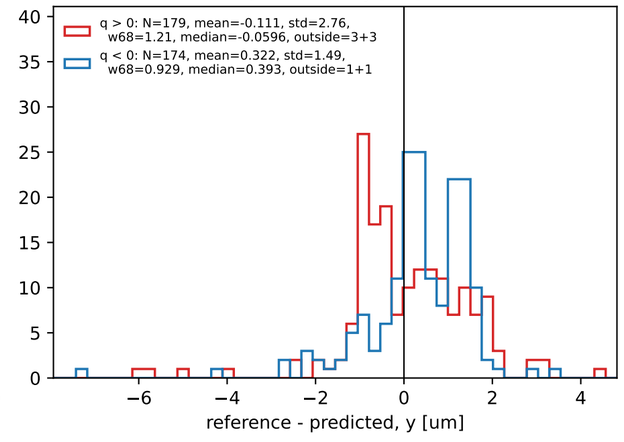

[8, 16) GeV, x [um]

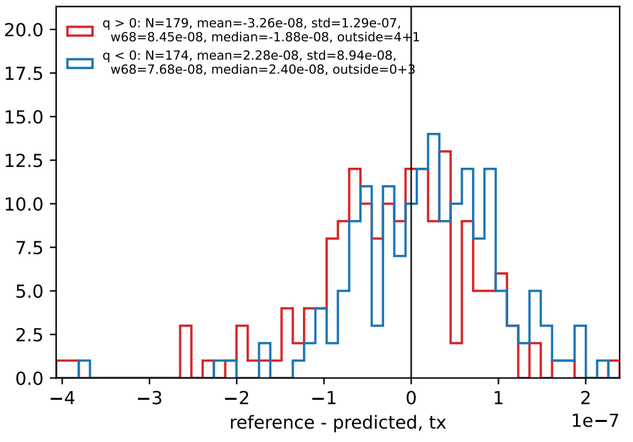

[8, 16) GeV, y [um]

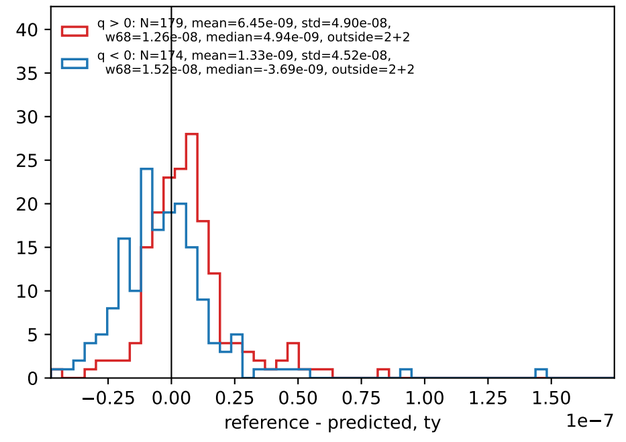

[8, 16) GeV, tx

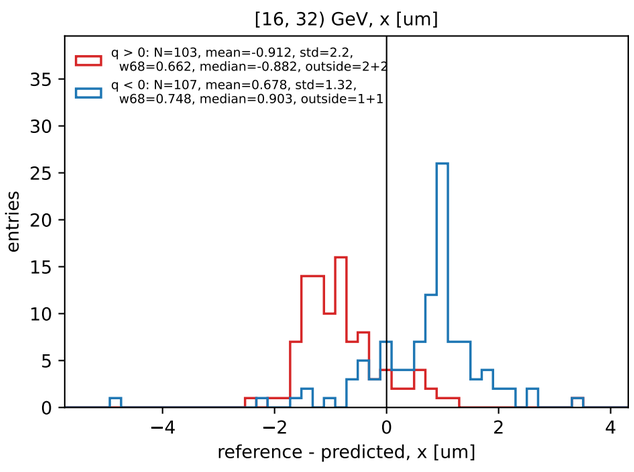

[8, 16) GeV, ty

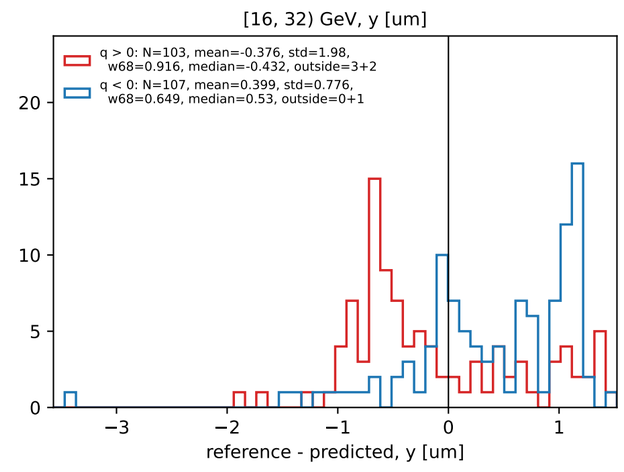

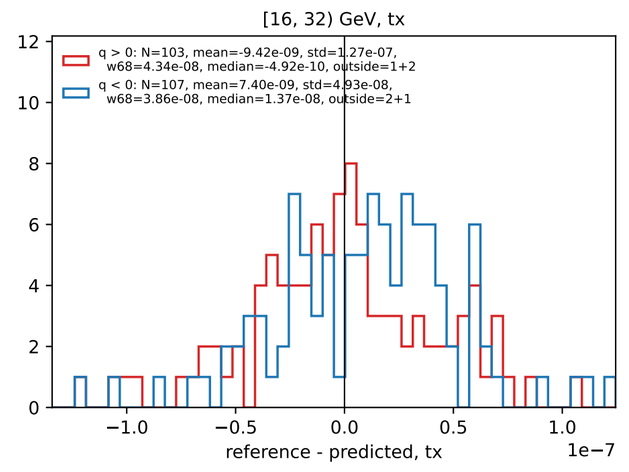

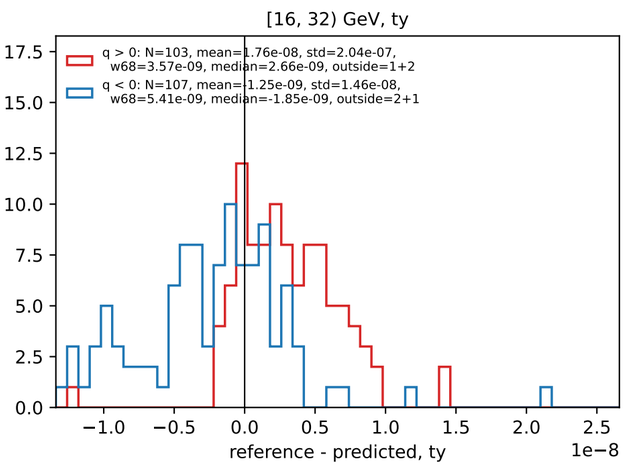

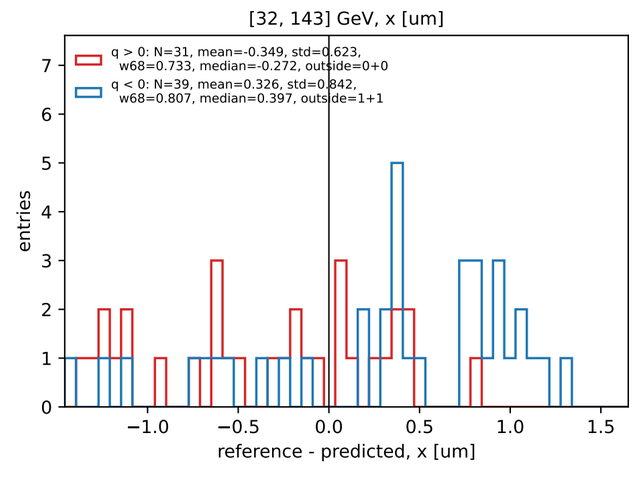

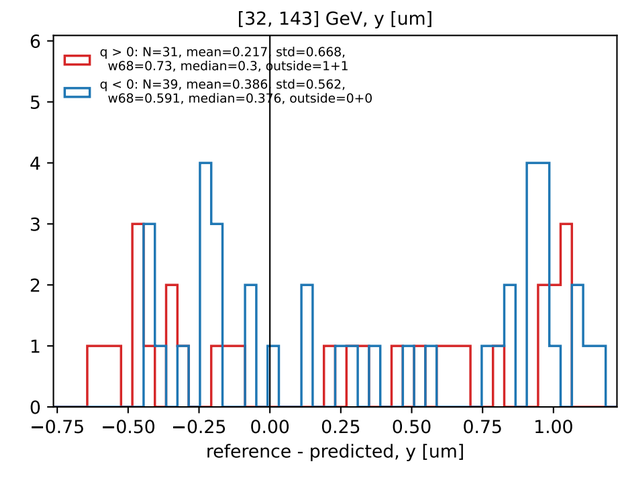

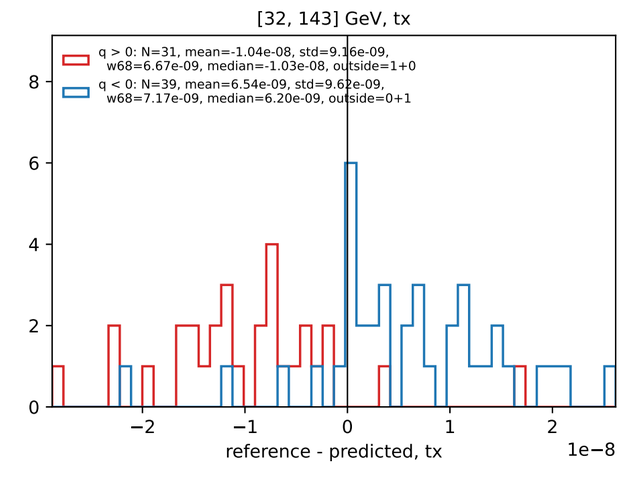

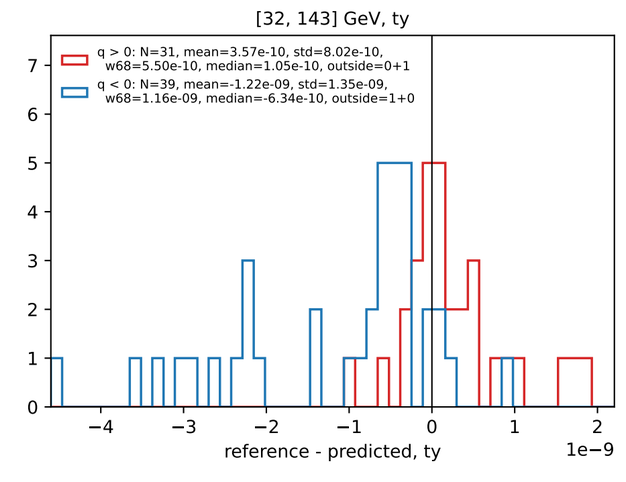

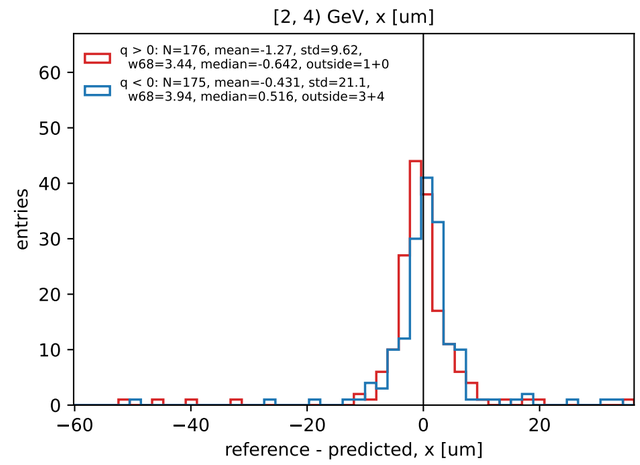

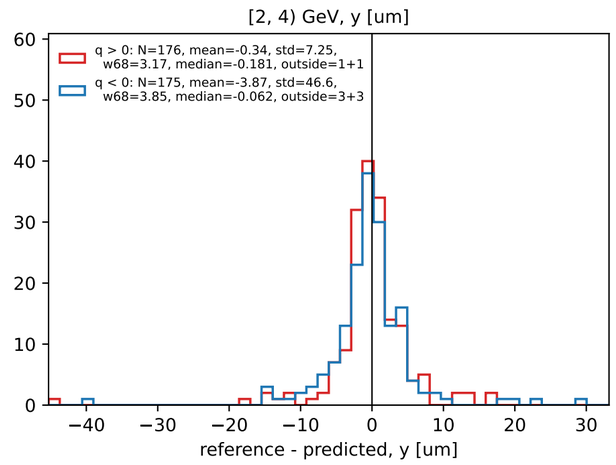

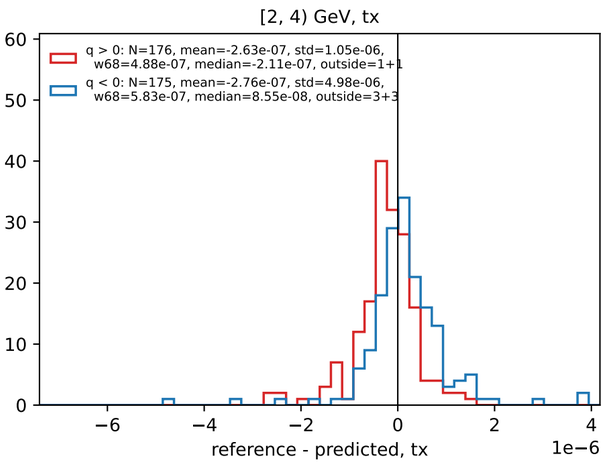

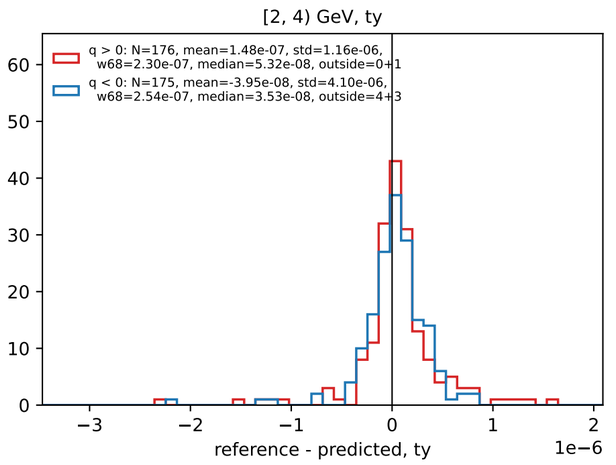

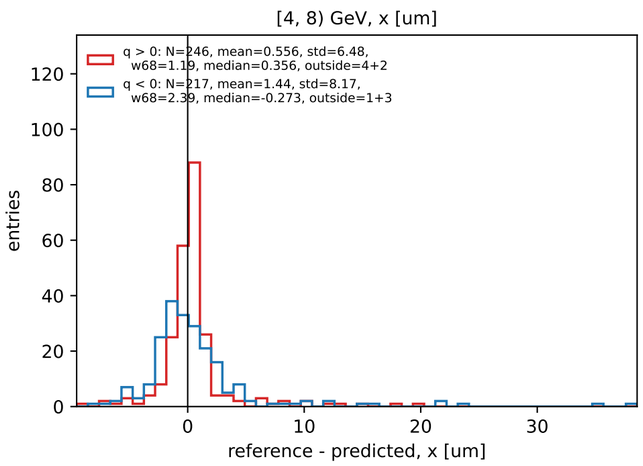

straight line, per-track scale, 64 steps: endpoint, signed deviation reference (RK6) - predicted, test split, by charge
run 25dfa17ef168; x-range = 1st-99th percentile of both charges; outside = entries below+above the range (counted in N, mean, std, w68); w68 = half the 16th-84th percentile range
endpoint: whole track carried by the network from the first plane, compared on the last plane; one entry per track

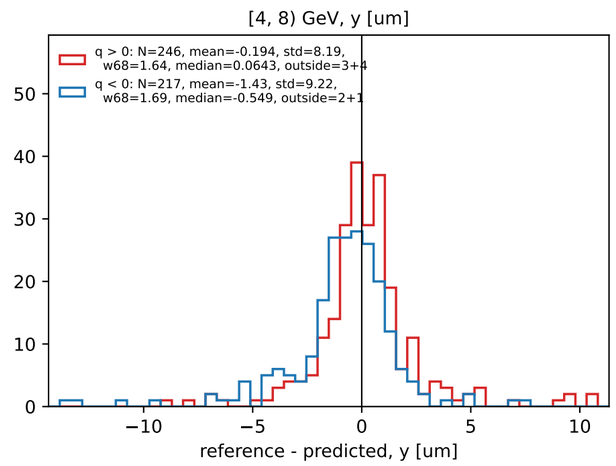

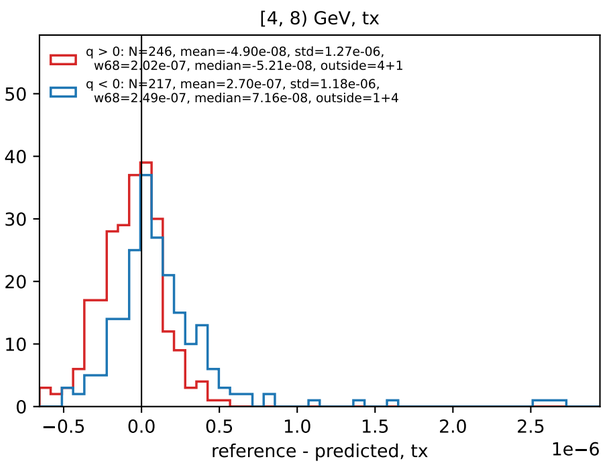

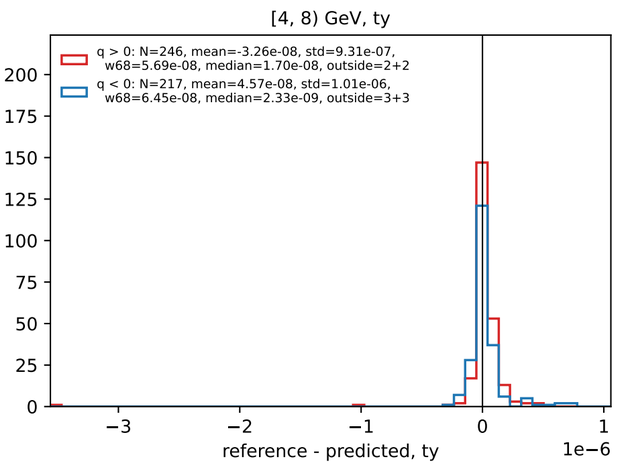

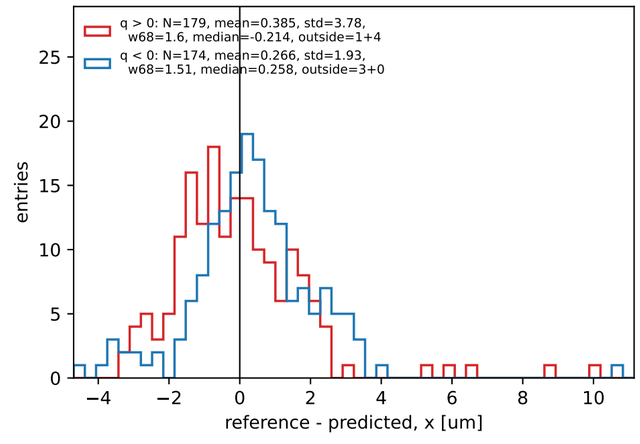

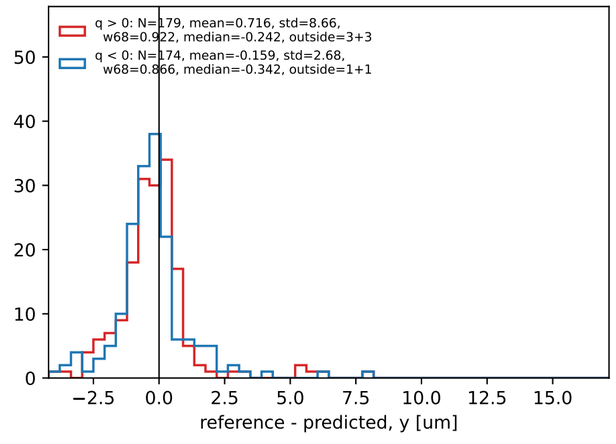

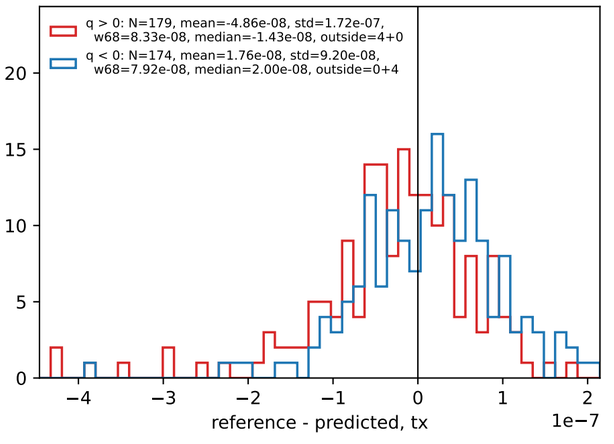

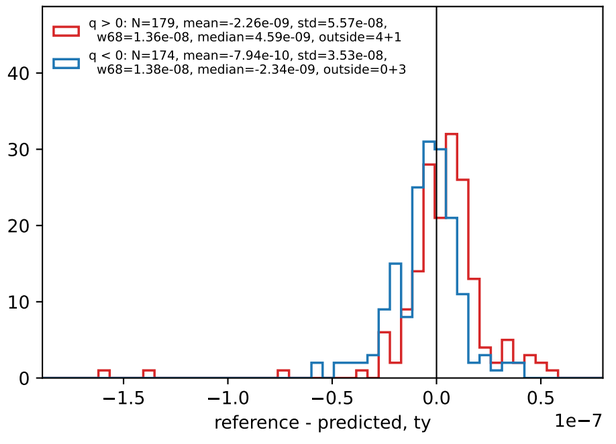

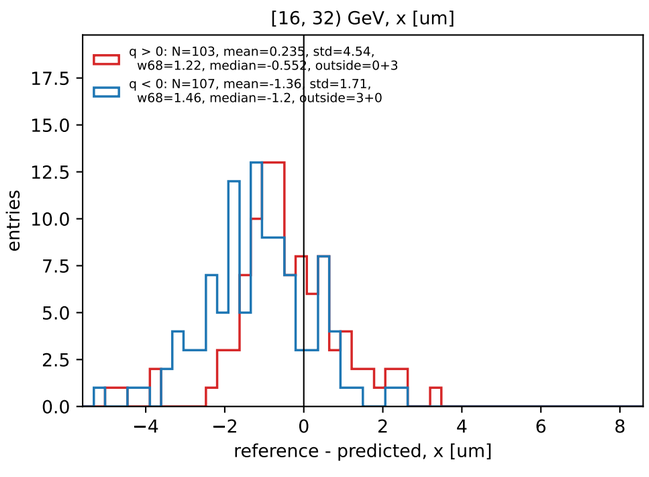

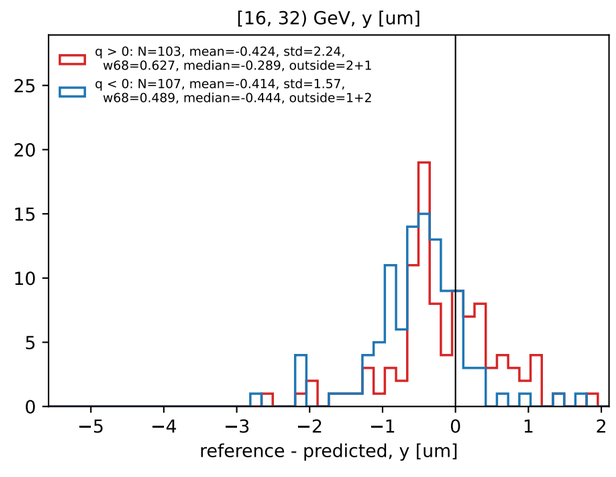

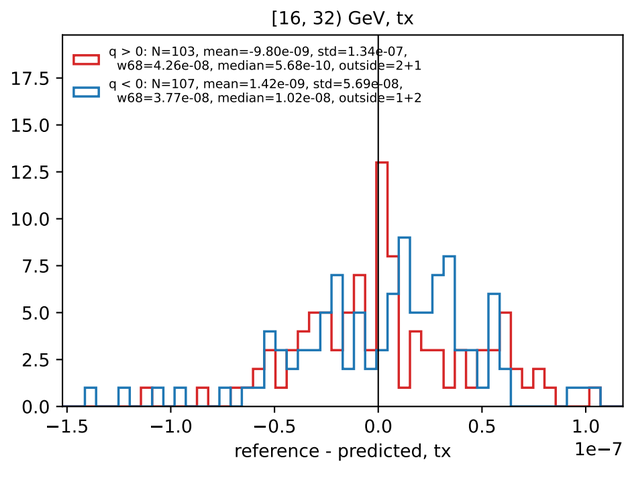

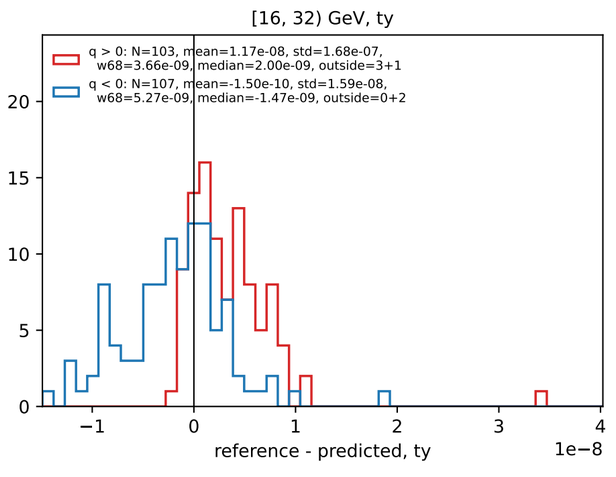

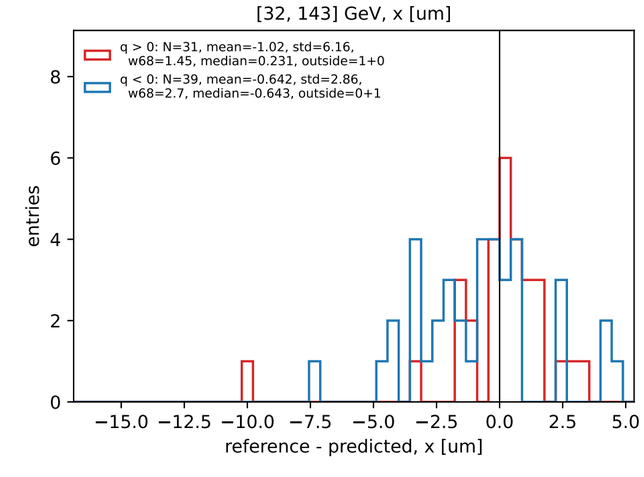

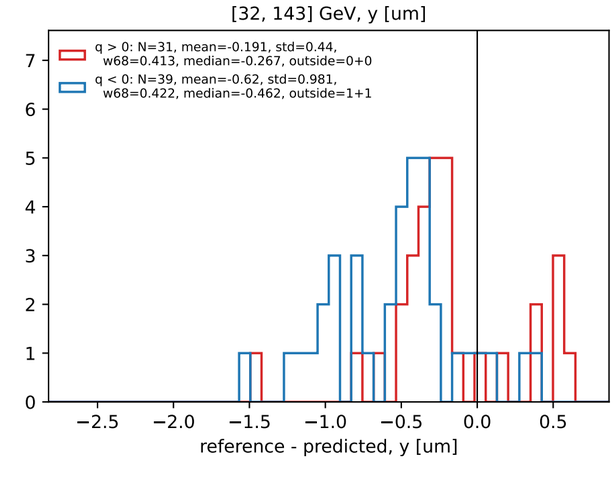

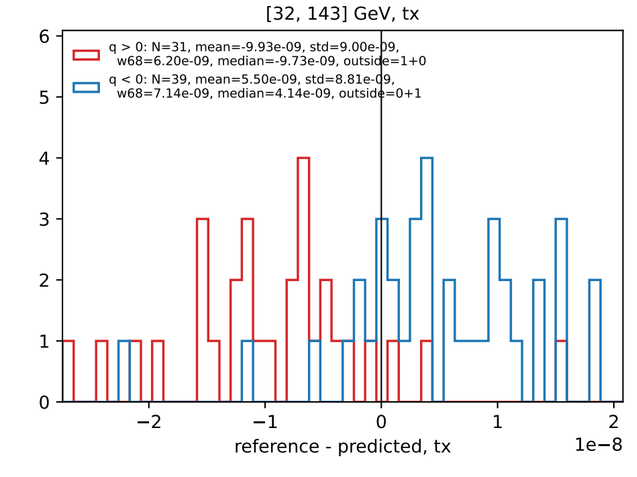

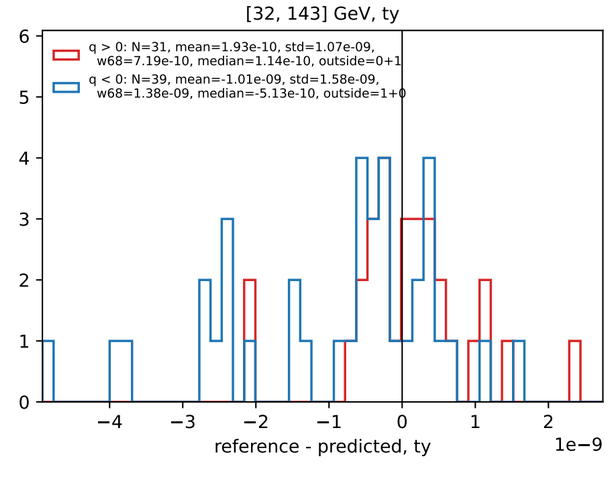

direct stage states, 64 steps: endpoint, signed deviation reference (RK6) - predicted, test split, by charge
run 49e5e2450eaa; x-range = 1st-99th percentile of both charges; outside = entries below+above the range (counted in N, mean, std, w68); w68 = half the 16th-84th percentile range
endpoint: whole track carried by the network from the first plane, compared on the last plane; one entry per track
